

CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name: LUL #3070996 for the Town of Kevin to use existing two track trails, limited cross country travel, and to perform minor construction and maintenance of their existing water supply system.

Proposed Implementation Date: Summer 2011

Proponent: Town of Kevin, PO Box 137, Kevin, MT 59454

Location: See below list of tracts and attached map.

County: Toole

Trust: Common Schools (CS)

I. TYPE AND PURPOSE OF ACTION

The proponent has applied for a LUL for the use of existing two track trails, limited cross country travel, and to perform minor construction and maintenance of their existing water supply system. Springs 1, 2, and 3 and wells 2, 3, and 5 as well as the water collection and transmission mainlines are covered under easements D-2297, D-2296, D-2299, and D-2298. The proposed LUL #3070996 will be to authorize any work outside of the Town of Kevin's easement corridor.

Township	Range	Section	Portion	Acres Affected	Trust
35N	4W	11	SE4	160.00	CS
35N	4W	12	NE4, S2	480.00	CS
35N	4W	13	W2	320.00	CS
35N	4W	14	E2	320.00	CS
TOTALS				1,280.00	CS

II. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED:

Provide a brief chronology of the scoping and ongoing involvement for this project.

DNRC-Surface
Bruce and Doreen Gillespie-Surface Lessees, Lease #2146 and #2147
Town of Kevin-Proponent

2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:

DNRC is not aware of any other agencies with jurisdiction or other permits needed to complete this project

3. ALTERNATIVES CONSIDERED:

Alternative A (No Action) – Deny the proponent the requested LUL #3070996.

Alternative B (the Proposed action) –Grant the proponent the requested LUL #3070996.

III. IMPACTS ON THE PHYSICAL ENVIRONMENT

- *RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.*
- *Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.*
- *Enter "NONE" if no impacts are identified or the resource is not present.*

4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE:

Consider the presence of fragile, compactable or unstable soils. Identify unusual geologic features. Specify any special reclamation considerations. Identify any cumulative impacts to soils.

Soils and geology in this area are generally suitable for the use of existing two track trails, limited cross country travel, and to perform minor construction and maintenance of the Town of Kevin's existing water supply system. The proponent will use existing two track trails and limited cross country travel. Any disturbance to the soil in the construction and maintenance of the water supply system will require the site to be reclaimed. Reclamation requirements are to re-contour and reseed any disturbed areas with the existing grass types and seeding rates that are listed in item 7 of this assessment.

No cumulative effects to the soils are anticipated.

5. WATER QUALITY, QUANTITY AND DISTRIBUTION:

Identify important surface or groundwater resources. Consider the potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality. Identify cumulative effects to water resources.

No important surface or groundwater resources will be impacted by the proposed LUL #3070996 for the use of existing two track trails, limited cross country travel, and to perform minor construction and maintenance work to the existing water supply system.

Other water quality and/or quantity issues will not be impacted by the proposed action.

6. AIR QUALITY:

What pollutants or particulate would be produced? Identify air quality regulations or zones (e.g. Class I air shed) the project would influence. Identify cumulative effects to air quality.

The proposed LUL #3070996 will consist of only minor disturbance to soils, so no cumulative effects to air quality are anticipated.

7. VEGETATION COVER, QUANTITY AND QUALITY:

What changes would the action cause to vegetative communities? Consider rare plants or cover types that would be affected. Identify cumulative effects to vegetation.

The vegetation within the proposed project area consists primarily of native rangeland grasses, forbs, and shrubs. Existing two track trails, limited cross country travel, and minor construction and maintenance to the existing water supply system will occur, so only a minimal amount of existing vegetation will be disturbed. Any disturbed areas will be reclaimed and reseeded. The reseeding mixture will be as follows: Western Wheatgrass 35%, Slender wheatgrass 35%, Bluebunch wheatgrass 15%, Green needlegrass 10%, and Lewis Blue Flax 5%. The seeding rate will be 7 lbs of PLS per acre and if broadcast the rate will be doubled.

A review of Natural Heritage data through the NRIS was conducted and there were no plant species of concern noted or potential species of concern noted on the NRIS survey.

8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS:

Consider substantial habitat values and use of the area by wildlife, birds or fish. Identify cumulative effects to fish and wildlife.

The proposal does not include any land use change which would yield changes to the wildlife habitat. The proposed action will not impact wildlife forage, cover, or traveling corridors. Nor will this action change the juxtaposition of wildlife forage, water, or hiding and thermal cover. The proposed action will not have long-term negative effects on existing wildlife species and/or wildlife habitat.

9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES:

Consider any federally listed threatened or endangered species or habitat identified in the project area. Determine effects to wetlands. Consider Sensitive Species or Species of special concern. Identify cumulative effects to these species and their habitat.

A review of Natural Heritage data through the NRIS was conducted. T35N, R4W: There were two animal species of concern and zero potential species of concern noted on the NRIS survey: Birds-Golden Eagle and Ferruginous Hawk. These particular tracts of native rangeland do not contain many, if any of these species. Threatened or endangered species, sensitive habitat types, or other species of special concern or potential species of concern will not be impacted by the use of existing two track trails, limited cross country travel, and minor construction and maintenance of the Town of Kevin's existing water supply system.

10. HISTORICAL AND ARCHAEOLOGICAL SITES:

Identify and determine effects to historical, archaeological or paleontological resources.

No historical, archaeological, or paleontological resources were identified along the two track trails, springs, wells, water collections systems, or transmission mainlines. Minimal construction or maintenance to the water supply system will occur, so no cultural resources will be impacted by this proposed LUL #3070996.

11. AESTHETICS:

Determine if the project is located on a prominent topographic feature, or may be visible from populated or scenic areas. What level of noise, light or visual change would be produced? Identify cumulative effects to aesthetics.

The state land does not provide any unique scenic qualities not also provided on adjacent private lands. The proposed LUL #3070996 will use existing two track trails, limited off road travel, and easement corridors, so there would be no change to the aesthetics in either alternative.

No direct or cumulative effects to aesthetics are anticipated.

12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY:

Determine the amount of limited resources the project would require. Identify other activities nearby that the project would affect. Identify cumulative effects to environmental resources.

The demand on environmental resources such as land, water, air, or energy will not be affected by the proposed action. The proposed action will not consume resources that are limited in the area. There are no other projects in the area that will affect the proposed action.

13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA:

List other studies, plans or projects on this tract. Determine cumulative impacts likely to occur as a result of current private, state or federal actions in the analysis area, and from future proposed state actions in the analysis area that are under MEPA review (scoped) or permitting review by any state agency.

There are no other projects or plans being considered on the tracts listed on this EA.

IV. IMPACTS ON THE HUMAN POPULATION

- *RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.*
- *Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.*
- *Enter "NONE" if no impacts are identified or the resource is not present.*

14. HUMAN HEALTH AND SAFETY:

Identify any health and safety risks posed by the project.

The proposed LUL #3070996 will not impact human health or safety in the area.

15. INDUSTRIAL, COMMERCIAL AND AGRICULTURE ACTIVITIES AND PRODUCTION:

Identify how the project would add to or alter these activities.

The proponent will use existing two track trails, limited cross country travel, and minor construction and maintenance of the Town of Kevin's existing water supply system. LUL #3070996 will not add to or alter agricultural activities or production on the leases.

16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT:

Estimate the number of jobs the project would create, move or eliminate. Identify cumulative effects to the employment market.

The proposed action will not create any jobs as the use of existing two track trails, limited cross country travel, and minor construction and maintenance of the existing water supply system will take place.

17. LOCAL AND STATE TAX BASE AND TAX REVENUES:

Estimate tax revenue the project would create or eliminate. Identify cumulative effects to taxes and revenue.

The minor maintenance and construction will be performed in house by the Town of Kevin and their water system is existing, so no new tax revenue will be generated.

There are no direct or cumulative effects to taxes or revenue for the proposed project.

18. DEMAND FOR GOVERNMENT SERVICES:

Estimate increases in traffic and changes to traffic patterns. What changes would be needed to fire protection, police, schools, etc.? Identify cumulative effects of this and other projects on government services

There will be no direct or cumulative effects on government services.

19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS:

List State, County, City, USFS, BLM, Tribal, and other zoning or management plans, and identify how they would affect this project.

The proposed action is in compliance with State and County laws. No other management plans are in effect for the area.

20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES:

Identify any wilderness or recreational areas nearby or access routes through this tract. Determine the effects of the project on recreational potential within the tract. Identify cumulative effects to recreational and wilderness activities.

These tracts of state land generally have a low recreational value for hunting and fishing. These tracts are legally accessible to the public via Rim Road. The proposed action is not expected to impact general recreational activities on this state land.

21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING:

Estimate population changes and additional housing the project would require. Identify cumulative effects to population and housing

The proposal does not include any changes to housing or developments.

No direct or cumulative effects to population or housing are anticipated.

22. SOCIAL STRUCTURES AND MORES:

Identify potential disruption of native or traditional lifestyles or communities.

There are no native, unique or traditional lifestyles or communities in the vicinity that would be impacted by the proposal.

23. CULTURAL UNIQUENESS AND DIVERSITY:

How would the action affect any unique quality of the area?

The proposed action will not impact the cultural uniqueness or diversity of the area.

24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:

Estimate the return to the trust. Include appropriate economic analysis. Identify potential future uses for the analysis area other than existing management. Identify cumulative economic and social effects likely to occur as a result of the proposed action.

LUL #3070996 will benefit the school trust in terms of the \$25.00 fee generated from the LUL application fee. The LUL will generate an annual fee of \$150.00/year for the ten year term of the LUL for the Common Schools trust. Cumulative impacts are not likely as the area is used for grazing and the use of existing two track trails, limited cross country travel, and minor construction and maintenance of the existing water supply system will not affect the long-term viability of grazing on these tracts.

V. FINDING

25. ALTERNATIVE SELECTED:

Alternative B (the Proposed action) –Grant the proponent the requested LUL #3070996.

26. SIGNIFICANCE OF POTENTIAL IMPACTS:

The applicant will be utilizing existing roads to access infrastructure associated with the Town of Kevin's municipal water system. A very limited amount of cross country travel will occur. No road construction or road improvements will occur. The town of Kevin holds 4 DNRC easements for pipelines, wells and springs. This LUL will provide the Town with access to these easements for monitoring and maintenance of the water system. There are no other reasonable routes to provide access to these wells. Significant impacts are not anticipated as a result of issuing the LUL.
